7+

TM

Super 7+ Navel Dip is an umbilical cord dry-out and protective solution for newborn animals. This effective and completely safe formula has been developed strictly for the purpose of animal umbilical cord dry-out. Super 7+ Navel Dip dries down the umbilical up to 50% faster than the competition. Super 7+ Navel Dip is formulated with ingredients that are safe for animals and the environment.

- Ultra-Fast Umbilical Dry Down
- Non-Flammable
- Non-Toxic
- Environmentally Safe

Vetericyn®

Features and Benefits:

- Effective alternative to 7% / 10% tincture of iodine (also known as strong iodine)
- Ultra-quick umbilical dry down
- Dyed solution for rapid identification of dipped animals
- Easy to use
- Safe for the animal, the employee applying the product, and the environment
- Can be used on animals whose umbilical cords were torn off at birth
- Non-flammable and non-corrosive
- No special handling requirements or “hazard fees”
- No toxic fumes
- Long shelf life

TESTIMONIALS

“We’ve tested Super 7+ Navel Dip on hundreds of calves and haven’t had a single infection or abscess. Dry-down times are much faster than iodine, with a whole lot less hassle.”

Cody, Michigan Dairy Herd Manager

“Super 7+ Navel Dip appears to be another impressive offering from Innovacyn. It is user friendly and early observations are showing a reduction in navel infections in problem herds.”

Dr. Thomas Petznick, DVM

Immediately After Dipped Navel

After 8 Hours

FAQs:

Is this product safe?

Yes. Super 7+ Navel Dip is non-toxic and safe for newborn animals. It is also non-flammable since it doesn't contain alcohol like strong iodine. In addition, those who have iodine allergies/sensitivities prefer using Super 7+ Navel Dip.

How does it work compared to strong iodine?

Super 7+ Navel Dip provides very fast dry down time of the umbilical cord. The combination of safety and effectiveness beats any other navel dip on the market.

Does Super 7+ Navel Dip contain dye?

Yes. Super 7+ Navel Dip has staining properties similar to strong iodine for indication that a navel has been dipped. Simply rinse any spills with water and follow proper instructions for use.

Can more than one navel be dipped per drawn solution of Super 7+ Navel Dip?

To expedite dry-down time, we recommend dipping only one navel per dose of solution. To prevent cross-contamination of bacteria, use a non-return dip cup.

Does this product need hazardous material paperwork like strong iodine?

No. Super 7+ Navel Dip does not require hazardous material paperwork like strong iodine because it is not regulated by the Drug Enforcement Administration.

What animals can Super 7+ Navel Dip provide protection for?

This solution can be used on cattle, swine, sheep, horses, goats and dogs. Do not use Super 7+ Navel Dip on animals within 72 hours of slaughter.
